ANT FLAT LANDFILL Recycles scrap metal, appliances, and electronics. Open 10-3:30 W, F-SU

FOLLOW THESE THREE EASY STEPS!

1. KEEP IT CLEAN, DRY, AND SEPARATED
2. REMOVE LIDS AND LABELS
3. WHEN IN DOUBT, LEAVE IT OUT!

Please no food waste, household garbage, broken or sharp objects. Please flatten cardboard. Rinse glass, metal, and plastic containers. Remember, your recycling should never smell!

PLEASE NO HAZARDOUS WASTE!

For hazardous waste disposal information visit:
co.wallowa.or.us/public-works/solid-waste

A WORD ON CONTAMINATION

Recycling correctly maximizes the chance that everything will be fully recycled and not sent to the landfill. For example, a single piece of styrofoam in a cardboard bale could mean a buyer rejects it and sends the entire load to a landfill. It's important that we get it right. When we recycle right, it decreases labor costs and increases market prices. These are crucial elements to sustaining a community recycling program.

REDUCE, REUSE, RECYCLE!

Recycling isn't a stand alone solution! Reducing and reusing what we consume are the first steps to waste reduction. Recycling is the final option to keeping waste out of the landfill. The volunteer-led recycling task force is working in partnership with Wallowa County's Solid Waste Department to find waste reduction solutions based on expanding these three principles.

A big part of our effort relies on community involvement--we are always looking for ideas, collaboration, and volunteer support. If you have recycling questions, ideas, or want to get involved in our efforts, please see our contact information listed below.
